

1 Preliminaries

Make sure you have nodejs installed on your system

First, create a new project folder, I named mine: "PlugShareCrawleeProject"

Change your directory to this folder

While in this folder, run `npm init -y`

Run the following commands in your terminal

- `npm install crawllee`
- `npm install playwright`
- `npx playwright install`
- `npm install fs`

Make sure the code "PlugShareCrawleeScraper6_1_25.js" into your project folder and open in Visual Studio

to run the script, simply run: **`node PlugShareCrawleeScraper6_1_25.js`**

2 Extra

Here is a test station for testing how it does with scraping a real time station

- `https://www.plugshare.com/location/480951`
- make sure in your "package.json" you have the following line:
 - `"type" : "module"`
 - 1603 observations for 1 hr 27 minutes – 87 minutes
